[The League](#)

(section to be developed)

This section will contain information about and links to:

- Community College Consortia formed around the VCC initiative
- Organizations that have provided formal statements of support for the VCC
- Institutions that have expressed their willingness to collaborate in areas such as:
  - Community College Research
  - Student and Institutional Research
  - Modeling and Game Research
  - Participate in beta testing of the system
  - Information Systems and AI research applied to VCC
- High School Districts that have formally shown interest in developing a similar game for High Schools

---

The VCC management game will simulate...

- Student success, Retention Management, Persistence and Graduation
- Performance Management and Leadership Development
- Strategic Planning
- Financial Management
- Other organizational support systems of the Community College

The VCC game utilizes technologies from several domains

- Monte Carlo simulation and AI
- Unified Modeling Language for software engineering
- Agent-Based simulation
- Human Behavior simulation
