[Click here to take the Virtu@I CC tour !](#)

Virtu@I CC is promoted by the "Educational Technology R&D Foundation" (ETRD) and was funded by a planning grant awarded by the [Sloan Foundation](#).

[Research plan...](#) [Enrollment Models...](#) [System Architecture](#)

[Learning-Centered Student Success](#)

[Student Development](#) and [Learning theories](#) make up the framework that molds the VCC games. Virtu@I-CC will enable players to simulate both [Student Success](#) and [College Management](#) via games that challenge players to navigate the complex *synergy* that emerges among [student outcomes](#), graduation patterns and [Student Retention](#).

[Faculty Success](#)

The success of the college depends largely on the success of its faculty, for whom pedagogical quality is a key factor. Virtu@I-CC will place great importance on faculty development as a critical success factor. However, future simulator's components will place special emphasis on [new faculty success](#). As development tools, the game will feature strategies such as [Quality Matters\(c\)](#) which is used for the continuous quality improvement of the teaching and learning process.

[Learning-Centered Leadership](#)

The Mission of Virtu@I CC is to develop empowering tools for a new generation of community college leaders, by providing "computer-simulated hands-on practice" on College Leadership and Management. Virtu@I-CC pursues a gradual design and creation of tools for the development of high level skills that can be applied to [Enrollment Management](#), [Business Intelligence](#), [Performance Monitoring](#), and [Quality Management](#), under a learning-centered focus.

[Research plan...](#) [Enrollment Models...](#) [System Architecture](#)

Software and documents produced by Virtu@I CC will be used freely by any college. Free utilization by any other type of organization or individual needs previous written authorization issued by either Virtu@I CC or by the funding agencies that have awarded grants for the development of the VCC project.
